

# About Us

We are a Wisconsin based, electrical contracting company offering a commanding knowledge of electrical construction management in both specialized and diversified sub markets; whether in the private sector, municipal or government.

We provide excellence in full electric service project planning, cost management, and field operations management, utilizing well-developed management practices and a combined 45+ years experience within the electric industry.

Regardless of project size, we offer robust leadership and serve well as an electrical contractor, electrical subcontractor, the electrical project manager and/or the sub-contracted labor. No matter what our role, our solid expertise enables us to provide unsurpassed levels of competence, experience, ingenuity and flexibility to consistently deliver well-planned and executed results.

# Services

We don't claim to be better than other electrical service firms, we prove it!

Above all else, K & B ELECTRIC continually strives to clearly demonstrate that our company, and our people, can be well trusted to consistently deliver the necessary skill sets and high professional standards expected on each and every job site.

We bring excellence in full service electric project planning, cost management, and field operations management, utilizing well-developed electric project practices—new electric construction, additions, remodels, build-outs, renovations, maintenance, and energy saving, green lighting installation and retrofit services.
